### Coding list for sports (Questions 8a, 10a and 10b)

Coding instructions:

The following list is based on ISSP countries' most prominent sport activities. The questions on sport activities are asked open-ended. Thus, respondents' answers or entries have to be coded either by interviewer, coder or other persons from ISSP countries' staff according to that scheme into numeric values (three digits). Please note that country-specific codes or codes **not** included in the following list **cannot** be accepted for the international and integrated ISSP file.

Sport activities are organized into four main groups (100=Team sports, 200=Racket sports, 300=Athletics and fitness sports, and 400=other sports). The main groups offer detailed categories: Team sports, e.g., start with American football (101) and ends with volleyball (112). If possible, then these detailed categories should be coded prior to the general ones of the main groups. Main groups should **only** be coded if respondents answer or enter a general main group, f.e. racket sports. If there are any activities which are not explicitly listed, then, please, code into one of the "other" categories: 199= "other team sport", 299="other racket or bat sport", 399= "other fitness sport" or 499= "other sport". Please only use 499="other sport" if more precise classification is not possible.
